

# CORROSION RESISTANT STEELS - MARTENSITIC, SEMI- MARTENSITIC AND FERRITIC STEELS

## Application Segments

---

Aerospace

## Available Product Variants

---

Long Products\*

Plates

\* Presented data refer exclusively to long products. Please observe the detailed explanations at the end of the data sheet (pdf).

## Product Description

---

BÖHLER N695 is a Chromium alloyed stainless steel with high hardness, wear resistance and good corrosion resistance in the hardened and tempered condition. this grade is typically used for parts requiring hardness up to 58 HRC and resistance to wear, corrosion, and oxidation, e.g. balls, rollers, needles and rings for corrosion resistant bearings, but usage is not limited to such applications.

## Process Melting

---

Airmelted

## Properties

---

- > Toughness & Ductility : good
- > Wear Resistance : very high
- > English (United Kingdom) : good
- > Dimensional stability : good
- > Polishability : good
- > Corrosion resistance : high

## Applications

---

- > Aerospace
- > Turbine and Engine Parts (Aerospace)
- > Other Aerospace Components
- > Bearings

## Technical data

Material designation		Standards	
440C	Market grade	5630	AMS
1.4125	SEL

If other available product variants are listed in addition to long products, please note that these may differ in terms of melting process, technical data, delivery and surface condition as well as available product dimensions. For mandatory technical specifications, other requirements and dimensions, please contact our regional voestalpine BÖHLER sales companies. The data contained in this brochure is merely for general information and therefore shall not be binding on the company. We may be bound only through a contract explicitly stipulating such data as binding. Measurement data are laboratory values and can deviate from practical analyses. The manufacture of our products does not involve the use of substances detrimental to health or to the ozone layer.
