

# THE BÖHLETIN

## New AIRBUS approval for plates in **BÖHLER N701** – ABS5454 / AIMS01-04-001 successfully finished

**15-5PH / BÖHLER N701 MATERIAL  
IS ONE OF THE MOST IMPORTANT STEEL  
GRADE IN THE AEROSPACE INDUSTRY.**

The precipitation hardenable stainless steel is remelted under vacuum (VMR) and shows highest toughness and strength values. Our plates are used for critical as well as non-critical structural parts in the Aerospace industry, for pumps and valves in high pressure components and several other applications, where good corrosion resistance, strength and toughness is required.

Beside the AMS5862 and several other OEM specifications, we can offer now also plates according to ABS5454 / AIMS01-04-001 specification. Our approval is valid for the solution annealed as well as for the precipitation hardened condition in the thickness range of  $6 < s \leq 40$  mm.

We produce our products to the highest quality standards to fulfill all requirements for demanding applications.

**BÖHLER special steel  
for the world's top performers.**
